Mini Crosser M¹ - The original

The Mini Crosser is made in Scandinavia, specifically for Nordic conditions. It is the best-selling electric scooter in Northern Europe. We can supply a comprehensive range of scooters and accessories. The features that set the Mini Crosser apart are **functionality, strength, comfort, durability, safety and overall economy.** The Mini Crosser is suitable for all types of users – adults and children, large and small!

In our experience, adaptability and flexibility are really important factors for lots of users, especially those with arthritis, muscular atrophy, MS, back pain, etc. A user's needs often change with time, for example a different accelerator control, a larger seat, extra support, electric add-ons and other accessories. With the Mini Crosser M¹ series and the wide range of accessories, the future is secure. The Mini Crosser can follow the user through thick and thin, even when needs change.

Individual suspension both front and rear, LED lights, easy seat height adjustments and many new features are now standard on the M¹.

This new M¹ is available both as a 3- and 4-wheeled version.

- Features on the M¹...

Suspension - Unique adjustable suspension.
4-wheel version

- Independent front wheel suspension.

Wheels - Bigger wheels.

Mileage - the possibility for different mileage up to 80 km at 115 Ah batteries, easy to change.

Handbrake operating on rear wheels, the new standard in safety.

New seat post

- Seat Height adjustable without tools.

Increased user weight

- up to 175 kg in the standard version.

New lights and indicators

- light emitting diode (LED) - maintenance free.

Integrated mudguard on 4-wheel model.
